CURATOR

Seaga IIC Curator allows more accessibility and a better experience for the entire IIC line up. When it comes to convenience, it is art to beat the interactive kiosk or self-service terminal for quick access and check out of high usage items. The IIC Curator allows users to gain access to consumable and check in/out items with 24/7 access. Less time is spent in line with more control over the items you need access to quick and easily, eliminating the need for assistance from an employee.
