

GUARDMAX

The IIC GuardMAX™ provides 48 secure compartments that can be customized for superior product flexibility. Control inventory of many items even if space is limited. Check-in/Check-out capable with detailed reporting features. Eliminate human error from inventory control and create a usage-based environment that can reduce waste by up to 30% and demonstrating significant savings.

Powerful reporting software provides a clear accounting of supply usage, enables forecasting and can provide a reduction of inventory levels by 50% or more. The reporting software is capable of automatic user-defined alerts, including escalation ability. This Industrial Vending management system will maximize productivity by reducing inventory, expenditures, monitoring consumable inventory, and providing 24/7 access to MRO tooling.

IQ48

IIC GUARDMAX 48 DOOR LOCKER

IIC GuardMAX provides 48 secure field adjustable compartments and is the perfect addition to the IIC family. Simple pairing makes it possible to combine any combination of the vertical compartments, offering limitless flexibility in the inventory that can be controlled. Check-in/check-out capabilities and a robust cloud-based software package that integrates with reporting features, the IIC GuardMAX provides clear accounting of supply usage.
