

# IIC SIGHTGUARD LITE

A high-performance, intelligent solution engineered for precise tracking and control of consumables ranging from drill bits to critical IT components. The Sightguard and the more compact Sightguard Lite leverage advanced monitoring technology and can function as fully independent systems or seamlessly integrate with our smart-locker for a unified inventory-management ecosystem.

# IIC SIGHTGUARD LITE

Prevent inventory shortages and enhance operational efficiency with the IIC SightGuard inventory control system. By removing human error from stock management, IIC SightGuard Lite establishes a consumption-based workflow that can reduce material waste by an average of 15–30%, delivering measurable financial benefits in a short period of time.

## MARKET SECTORS

- PPE
- MRO Products
