IIC SightGuard™ PPE

Protecting the safety of your employees and customers is critical! Facemask and safety vending machines are continuing to appear in workplace and retail environments around the globe! Seaga can help you plan & implement your own PPE vending program.

You can eliminate stock outage and increase productivity with the IIC SightGuard™ PPE inventory control system. The IIC SightGuard™ PPE removes human error and stock outages. It creates an environment that can reduce waste up to 30% or more. This provides a significant savings almost immediately to all companies. The IIC SightGuard™ PPE limits human interaction keeping the end user safer and productive.

With Powerful reporting software that provides a clear and accurate usage of the PPE that is being supplied, it allows proper forecasting and reduction of inventory levels. The automated reporting is capable of defining users, setting alerts and allocation codes for product or users. Alerts and reporting can be escalated in real time so products are accessible 24/7
